

DATA SECURITY & DESTRUCTION

PROTECT YOUR ORGANISATION WITH SECURE SOLUTIONS

Take control of data security, privacy issues and brand protection

Organisations are increasingly mindful of the need to effectively manage sensitive data. Inadequate management of IT assets has the potential to result in identify theft and unauthorised use of information.

ECOACTIV solutions allow IT managers to better manage the process of data erasure and surplus equipment disposal.

We can tailor your data security and asset disposition so that decommissioned equipment can be securely destroyed, redeployed or recycled.

Our data and equipment destruction approach is focused on compliance, verification and environmentally sound processing.

Our experienced team provides support to organisations through practical expertise in safely managing data security and destruction on unwanted IT equipment.

COMMON ISSUES FOR OUR CUSTOMERS

Corporates, agencies, institutions and NGOs have common issues when managing data security and hardware destruction:

- × Proactive risk management objectives
- × The need to destroy decipherable data and/or storage devices
- × The importance of certificates of destruction and recycling for corporate reporting purposes
- × Compliance with ATO and PCI data security requirements
- × Ensuring uncomplicated redeployment of sanitized hardware
- × Ensuring the physical destruction of IT equipment and corporate merchandise
- × Protecting your brand's reputation and your customers' personal data
- × Eliminating the risk of identify theft
- × Eliminating the risk of unauthorized data access resulting from inadequate disposal of hardware

HOW INFOACTIV HELPS

We understand the specifics of delivering data and hardware destruction services. Our approach is customer-oriented with a focus on compliance and your needs.

We can assist you to assess the level of data wiping or equipment destruction required.

Our ECOACTIV solutions extend across strategy, design and implementation. It can cover:

- × Collection systems
- × Logistics, reuse and/or recycling
- × Data wiping & sanitization
- × Physical destruction
- × Audit and compliance
- × Data collection & reporting

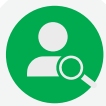

Our end-to-end operational management of Data Destruction can ensure a highly monitored chain of custody that protects your organisation.

CUSTOMER BENEFITS

- × Protection of intellectual property and sensitive commercial or personal data
- × Brand & reputation protection
- × Equipment, media storage devices, apparel and associated data will not end up at landfill sites, transfer stations, export destinations or other unauthorised locations
- × Environmentally sound disposition and resource recovery
- × Removal of non-compliant, faulty or unsafe products from the market
- × Removal and destruction of credit cards and loyalty /store cards from the market
- × A flexible and scalable model depending on surplus equipment levels
- × Compliance with the Privacy Act and other data security/destruction standards
- × Assist with meeting requirements outlined in the Australian Government Information Security Manual

ECOACTIV Data Security and Destruction solutions cut across diverse product categories, industries and waste streams.

The focus is on safe and secure management of commercial and personal information. We add value, efficiency and effectiveness through environmentally sound outcomes.

CUSTOMER CASE STUDIES

DATA WIPING AND ERASURE

A leading supplier of laptops conducting a 'fleet refresh' required that all data be securely wiped from surplus equipment prior to redeployment, as well as documented data erasure prior to resale to external customers. ECOACTIV managed the process end-to-end to ensure a timely and secure outcome consistent with the supplier's data security procedures. A key part of the process was the use of certified data wiping technology: Blancco is the proven data erasure solution for millions of users around the world, and is the pioneer and global leader in data sanitization.

IT EQUIPMENT & STORAGE MEDIA

A major national manufacturer accumulated a variety of redundant IT devices including laptops, mobile phones, tablets, storage tapes, servers and hard drives, that required physical destruction, materials recycling and associated documentation within a specified time period from leaving the customer's premises. ECOACTIV managed the collection, destruction and recycling process to ensure 100% physical destruction of all items. This included verification and supply of Certificates of Destruction and Recycling for the customer's reporting purposes.

DELIVERED BY

Infoactiv is the leading independent supply chain and sustainability specialist working with customers and partners across the Asia Pacific region.
