

What can I recycle

SINGLE-USE BATTERIES:

- Alkaline batteries including AA, AAA, C and D sizes, and rectangular 6 and 9 volt batteries.
- Button cell batteries used in watches, cameras, toys, clocks and other small devices, comprising Lithium, Silver Zinc and other chemistries.
- All handheld batteries with chemistries including alkaline, zinc-carbon and lithium

RECHARGEABLE BATTERIES:

- Batteries used in handheld products and devices including Nickel Cadmium (NiCd, NC), Nickel Metal Hydride (NiMH, NM), and Lithium Ion (Li Ion) chemistries.

What happens to batteries collected through ECOACTIV?

Batteries collected through ECOACTIV are safely transported to a specialist facility where they are sorted by chemistry or battery type. They are transported to recyclers under strict standards and guidelines for processing and materials recovery.

ECOACTIV is operated by Infoactiv, a leading product recovery and stewardship organisation that is focused on environmentally sound solutions for consumers, business and government agencies. Infoactiv is a member of the Australian Battery Recycling Initiative (ABRI).

Keep batteries out of landfill

- × We have a pre-paid recycling service that helps you to cut waste and maximise positive environmental outcomes.
- × ECOACTIV Battery Recycling provides a low-cost, consumer friendly solution for keeping batteries out of landfill.
- × We are focused on ensuring that non-renewable resources are recovered and reutilised in the manufacture of new products.

Recycling batteries is important

Be part of the solution by subscribing to ECOACTIV Battery Recycling.

- × Lead, mercury and cadmium are particularly toxic, but other metals such as nickel can also be of concern if they leach into ground water.
- × Recycling batteries will help to conserve non-renewable resources.
- × Recycling batteries can recover up to 90% of the materials used in their manufacture.
- × Batteries are a risk to human health and the environment if disposed of inappropriately.

DID YOU KNOW?

Approximately 183 million batteries (8,000 tonnes) are disposed to landfill each year.*
